

ORIT

design MAX VOYTENKO

ORIT si configura come un insieme di linee nette e precise, tracciate con leggerezza, che si combinano e incastrano fino a formare oggetti di uso quotidiano. I tavolini di diverse dimensioni si innestano uno sull'altro, si intrecciano e si sciolgono in base alle necessità d'uso o al gusto personale di chi li utilizza.

ORIT is configured as a set of sharp, lightly drawn lines, which combine and interlock to form everyday objects. Small tables with different sizes are grafted one on top of the other, intertwining and separating to suit the taste or the need of the user.
