

# NORTH LIGHT

design VLADISLAV TOLOCHKO

La collezione prende ispirazione dagli affascinanti cieli del nord, dove la magia dell'aurora boreale, con le sue forme morbide e movimenti di colore crea disegni e colori sempre diversi. Le curve di NORTH LIGHT raccontano la meraviglia, l'emozione e la bellezza di cieli lontani con i loro colori vibranti di eterea luminosità.

The series is inspired by the fascinating skies of the North, where the magic of the aurora borealis creates ever-changing patterns and hues with its soft shapes and colour movements. The curves of NORTH LIGHT tell of the wonder, emotion and beauty of distant skies with their vibrant colours of ethereal luminosity.
