TELLUS

design DEBONADEMEO STUDIO

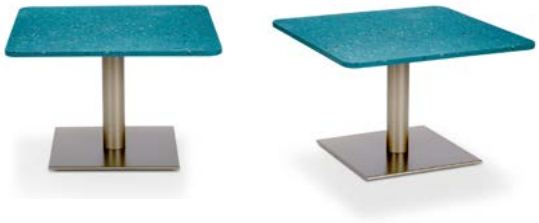

TELLUS porta la terra al tavolo. Piani in graniglia composta da materiali riciclati, una texture densa, viva, irripetibile, su base a colonna o zampette cilindriche. Ogni piano è un paesaggio diverso, plasmato da frammenti di marmi e vetri colorati recuperati.
La materia prima diventa materia del progetto. Un oggetto che porta con sé la memoria di ciò che era prima di diventare design.

TELLUS brings the earth to the table. Tops in terrazzo composed of recycled materials, a dense, living, unrepeatable texture, on a column base or cylindrical legs. Every top is a different landscape, shaped by fragments of marble and coloured glass recovered from waste. Raw material becomes the material of the project.
An object that carries the memory of what it was before becoming a design piece.
